# ninjaOne

We Simplify IT Operations

ninjaone.com/platform

Maintain your IT infrastructure, manage all your endpoints, and support your end-users on any network, from anywhere, at scale.

Do more with your existing IT resources

NinjaOne makes your IT team more efficient and effective with easy-to-use tools and powerful cross-platform automations that minimize administrative burden.

Protect your endpoints from ransomware

Get full visibility into your managed environments, automate vulnerability remediation, deploy next generation security tools, and backup critical business data all with NinjaOne.

> "On a daily basis, the Ninja Platform saves me so much time. If I had to dedicate time to patching, monitoring, backup, reporting, etcetera, I would not be able to focus on strategic projects like our business continuity plan and our cybersecurity strategy."
>

> Information Technology Officer

Take control of your IT assets

Monitor, maintain, and manage all your IT assets with powerful tools that put you in control of endpoint behavior and configuration.

Support end-users anywhere – on any network

Manage assets on any network and provide support to users wherever you or they are – all without the need for a company network, domain, or on-premises server.
