![GuardWare PROTECT]

Eliminates Data Theft Permanently

Achieve 100% Data Protection & Control

- ✔ **All the Time**
- ✔ **Any Data type**
- ✔ **Everywhere**
- ✔ **Remote Kill**

A Global Problem: A Single Crack and Your Data is Gone.

Billions invested in cybersecurity – yet your data remains defenseless.

Human Error

Malicious Insider

Shared Data

No Control

Supply Chain Risk

Data Ransomed

Market Gap

🚫 Data remains vulnerable to authorized access

🚫 No way to destroy lost or stolen data

🚫 No way to secure non standard data like design files, source code

🚫 No way to guarantee data destruction

🚫 No way to control data once shared with suppliers

🚫 No way to enforce NDAs

Solution: Build Data Self Defence

GuardWare PROTECT Persistently Encrypts and Secures Files of All Types All the Time

GuardWare
PROTECT

Hybrid Encryption. AES 256 & RSA 2048 Combination.

Highly Robust. Supports Offline, Online and Hybrid Operations.

Unique Format Preserving Encryption. Transparent to User.

Persistent. Stays Secure Even When in Use.

Unique Key for Each File. Enhancing Resilience.

Control All Data Through Centrally Managed Keys.

Supports Non-Standard Files like Design & Source Code.

Unique Wrapper Tech Allows Metadata Definition for Non-Standard Files.

8 1 2 3 4 5 6 7

ANY TYPE

Files Auto Encrypted: By Content, By Origin, By Type, By App that produces it, By Location, By User or Device, By Classification labels, By User intervention

---

## GuardWare Encrypted Files Remain Secure All The Time.

When Stored Anywhere

When Transferred Using Any Method

When Accessed by Application
