MSP Central
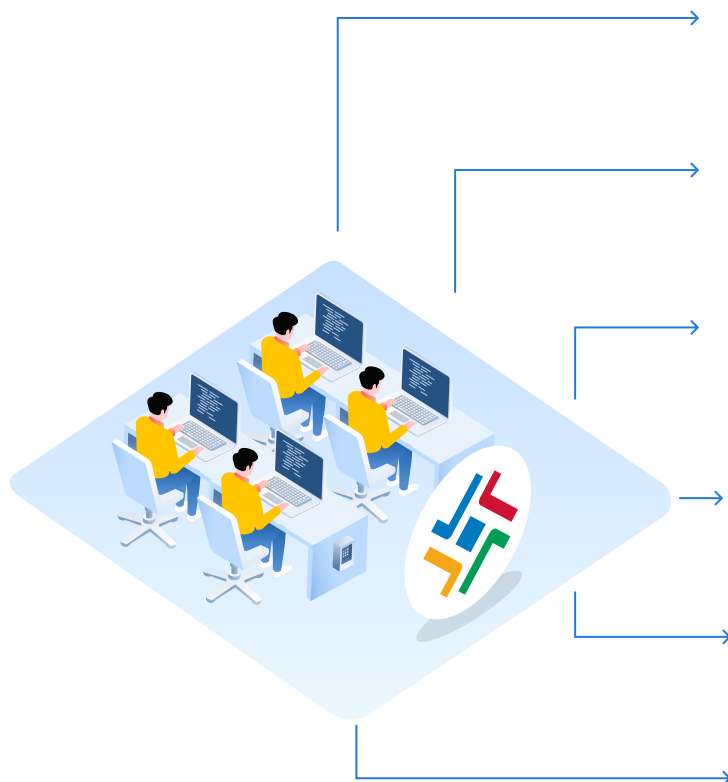

Launching MSP Central!
The all-in-one MSP growth engine

In today's competitive IT landscape, MSPs are strategically seeking solutions that enhance efficiency, security, and scalability. Traditional tools often operate in silos, leading to inefficiencies and missed opportunities.

MSP Central addresses these challenges by offering a unified platform that integrates remote monitoring and management (RMM), cybersecurity, and professional services automation (PSA). This combination ensures proactive endpoint management and monitoring, streamlined ticketing, and centralized operations—all critical for scaling MSP businesses while keeping clients happy.

MSP Central

Key features

PSA and ticketing:
Centralize service, streamline requests, and elevate client management.

Endpoint management and monitoring:
Proactively monitor, control, and maintain all devices remotely.

Endpoint security:
Gain client confidence with robust protection against threats, ensuring data integrity.

Server and network monitoring:
Real-time visibility and alerts for critical infrastructure health.

Reporting and analytics:
Acquire deep insights, showcase value, and make data-driven decisions.

Scripting and automation:
Automate daily operations with a massive library of over 300 scripts, or create custom scripts to free up your team.

Your path to success with MSP Central

- Onboard customers and associated contacts in minutes
- Manage service plans for each client
- Automate billing and track payment status
- Assign technicians and their roles
- Install RMM agents in bulk with zero hassle
- Set up remote offices without needing to be onsite
- Create custom groups and apply policies
- Deploy industry-standard compliance templates (HIPAA, GDPR, etc.)
- Generate onboarding and audit reports for stakeholders
