

Huntress Managed Security Awareness Training

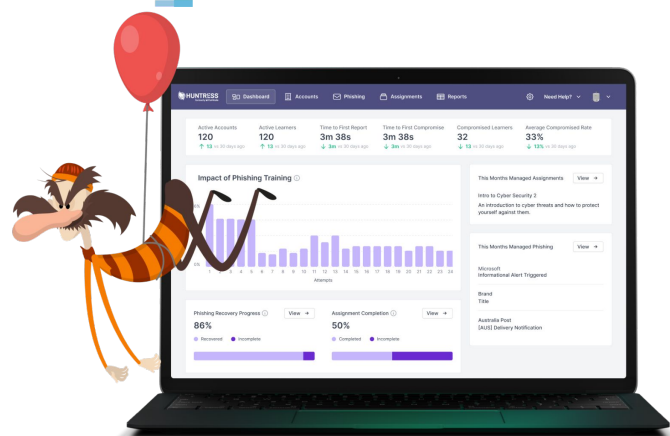

Huntress Managed SAT brings real security outcomes without the headaches.

Expert-Backed. Headache-Free.

Huntress Managed SAT was built for admins to make security awareness training easy. Onboard in minutes, enjoy fully-managed learning plans, and prove compliance with robust reporting.

It's backed by cybersecurity experts leveraging real-world threat intelligence from millions of endpoints and identities. They deliver engaging, story-based episodes, realistic phishing scenarios, immersive Threat Simulations, just-in-time Phishing Defense Coaching, and behavior-based assignments to keep learners ahead of crafty hackers while lowering human risk levels.

Your admins get fewer headaches, and your learners are prepared to stop whatever hackers throw at them.

Key Outcomes

Headache-Free

Built with the admin in mind. Fully managed training, onboard in minutes, robust integrations, peace of mind.

Expert-Backed

Prepare learners for real threats with training built by world-renowned experts in cybersecurity, adult learning, and animation, leveraging threat intel from millions of endpoints and identities.

Build a Security Culture

Approachable and consumable content, immersive Threat Simulations, gamification, & more make every learner an active participant in your company's cybersecurity.

Reduce Human Risk

Address risky behaviors with targeted training from just-in-time Phishing Defense Coaching for those compromised by a simulation, to behavior-based assignments for those compromised in the wild.

In-Depth Reporting

Stay in the know on everything from compromise rates, assignment completion, and Phishing Recovery Progress, to prove business, insurance, and regulatory compliance.

Don't settle for SAT that doesn't work. Get real results with Huntress Managed SAT.

Protect your people and your business.

Memorable Episodes

Built by Emmy®-winning animators, the story-based episodes use adult learning frameworks proven to boost retention and make complex topics approachable.

Realistic Phishing Scenarios

Train your learners on the threats they're most likely to see. With phishing scenarios built on threat-intel to reflect the tradecraft hackers are using today.

Fully-Managed Learning Plans

Let the Huntress security experts manage the creation, curation, and scheduling of content to get relevant and timely training without lifting a finger.

Phishing Defense Coaching

Train on mistakes while they're still fresh. Learners get immediate, personalized coaching on the exact phishing scenarios they were compromised by.

Interactive Threat Simulator

Go beyond phishing simulations with a hands-on experience carrying out different simulated threats. They'll learn to think like hackers so they can become defenders.

Behavior-Based Assignments

Identify and mitigate risky behaviors in the real-world. Assign relevant training content based on risky behaviors caught by other Huntress managed security tools.

Unparalleled Visibility into Threats Targeting Your Users

Training your learners based on real threat-intel from:

3.7M+

“

For clients seeking a higher security maturity level within the Essential 8, we also leverage Managed SAT, helping end-users stay informed on evolving threats and cybersecurity best practices. We've seen an increase in clients reporting suspicious emails or behaviour before incidents escalate – a direct result of ongoing, targeted training through the Huntress Platform.
